

## COMMUNITIES FOR CHILDREN - EARLY YEARS HUBS

The Communities for Children Early Years Hubs are facilitator supported playgroups that promote parent child bonding, early years learning, fine and gross motor skills, and literacy development. They also give parents and carers the opportunity to socialise, share experiences and connect with their local community.

Our trained facilitators share and practice evidence-based 3a Abecedarian teaching and learning strategies to use with children from birth to five years; these play a vital role in children's language development and life-long learning.

### Sing 2 Music

Enjoy music, rhythm, rhyme and dance for children and parents.

### Play 2 Music

Combines musical instruments and music to encourage rhythm and dance.

### Read and Grow

An evidence-informed literacy program which promotes development of early literacy and language skills, working to give children ages 2-5 years a good foundation. At each session a book is shared with a complimentary craft or activity.

### Cooking with Kids

Enjoy making easy, healthy, and tasty treats with your children in a supportive learning environment. This group encourages and role models Abecedarian adult-child interaction strategies and the development of early numeracy, literacy and language skills.
